

# BIMVET3

Co-funded by the  
Erasmus+ Programme  
of the European Union

**Official Newsletter of the**  
[Erasmus+ BIMVET 3](#)

**N° 4**  
**09/05/2022**

*Bimvet3, the erasmus+ project on BIM in VET formed by the consortium of UPCT, Balikesir University, CTCON, Vilnius Statybininku, I.P Leiria and ATENEA PROJECTS, invites you to read the details of our next courses, the result of our work.*

---

## **BIMVET NOW**

From the BIMVET3 project we announce that the training contents have been completed, all the partners have developed a series of contents that you cannot miss.

In the following months, each of the partners will carry out a mass dissemination event in their own country to publicise the different courses and training contents that our colleagues have developed within BIMVET3.

Visit our website and follow us on social networks and pay attention in the coming months.

Partners of the Bimvet3 project at the venue of the port authority of Cartagena.

The partners that make up the consortium have met in person for the first time in person. We have gathered in Cartagena for our "Learning Activity" and our first physical transnational meeting. The events were mainly organised on the facilities of the coordinating organisation UPCT.

During 3-5 May 2022, the partners had the pleasure to attend different training presentations from which we were able to learn and exchange views on BIM and its development in different projects. In these special activities, the partners attended conferences on practical and successful cases of BIM use, visited the different sites of organisations such as the Port Authority of Cartagena or the new Fablab of the Polytechnic University of Cartagena.

Bimvet3 partners visiting the fablab of the UPCT dependent on the Massachusetts Institute of Technology.

On the 6th of May the partners attended the transnational meeting at the UPCT facilities, where they agreed the last adjustments for the courses and contents of BIMVET3, with a view to its massive dissemination in the so-called "Multiplier Event".

Each partner country will hold a multiplier event in its territory to disseminate the contents and courses of the project in an open and massive way. Within these events, the partners will show the contents created, will present the training cycles and will make demonstrative tests of the functioning of the BIMVET3 platform, as well as hosting speakers of cases of use and success of BIM in each country who want to share their experience with students and professionals of the sector.

Bimvet3 transnational meeting in the facilities of the UPCT (Cartagena/Spain).

From this official Newsletter of the Bimvet3 project, we would like to thank the following for their selfless participation as speakers:

Miguel Hernández- BIM Manager at HOSCHBAHN.

Diego López Moya - BIM Manager at WSP.

Port Authority of Cartagena.

We would also like to thank our partners for their active participation, for exposing and sharing with the rest of our colleagues their ideas, projects and BIM training modules.

*If you want to know more about our contents and activities, follow us on our social networks and visit our page to be aware of all the updates.*

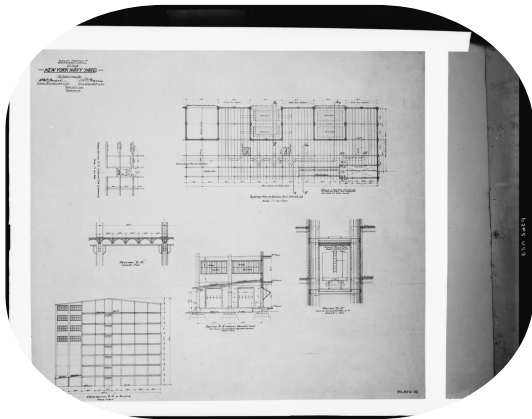

*We are waiting for you!*
